

Spa showers

*Bathrooms
with added value*

The bathroom –

Oasis of relaxation

A spa at home in your own four walls! Who has never dreamt of that?

In fact, you only need the right products and professional advice to turn a bathroom – however small – into a private oasis of relaxation.

The shower is without doubt the focal point of the planning. The first step towards a luxury shower is the integration of a bench seat. Seat heating, warm light and harmonious sound provide extra comfort. Would you like a little more? You can also use your shower as a steam bath by equipping it with the appropriate steam technology. Fortify your immune system and enjoy beneficial relaxation – on your own or with your partner.

LUX ELEMENTS®-SPA CAB leaves nothing to be desired. The choice is yours!

*Dreams
come true*

thanks to multifunctional building material

Whatever your spa oasis looks like at the end: For a carefree experience of your spa oasis right from the beginning and for being able to enjoy it for many years, you should attach particular importance to a moisture-resistant substrate.

Hard foam support elements from LUX ELEMENTS have all the material properties that are advantageous in wet and damp areas. They have been proving their worth for decades in bathrooms and spa facilities all over the world. The solid surface offers optimal adhesion for **tiles and plaster**.

For you, this means: **lots of free space for your individual wishes!**

Space for *Wishes*

The LUX ELEMENTS®-SPA CAB system is suitable for **every installation situation**.
It allows you to choose the basic shape, dimensions, equipment and technology.

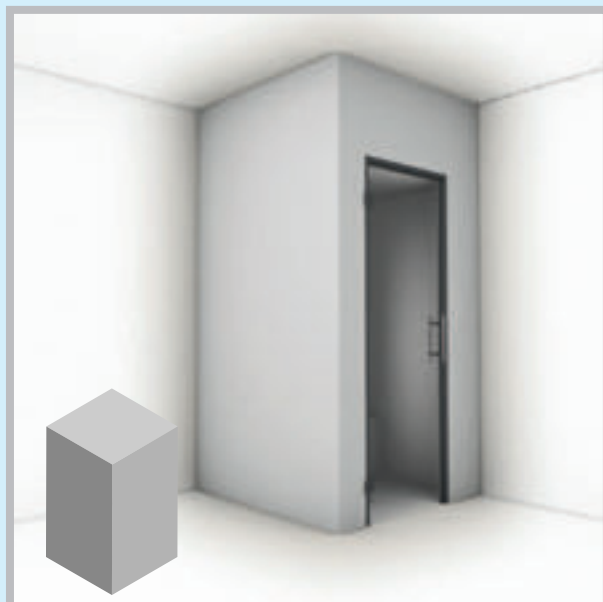

- Nine models in three basic shapes for one to two persons
- Standard dimensions are individually extendable
- Use as a shower or steam shower
- Doors and individual wall elements made of glass, framed in classy metal profiles, dark grey metallic
- Including shower seat, also with heating
- Including practical and decorative niche, also with light strip

The cabins are available in the basic shapes "pentagonal", "square" and "rectangular".

Not only the size of the room is decisive for the selection. The total concept of the room and the arrangement of adjacent elements influence the shape of the spa shower.

Basic shapes:

Variety

for every situation

People's wishes differ just as much as rooms. In order to satisfy all requirements, LUX ELEMENTS®-SPA CAB encompasses nine different standard cabin models. They differ in the shape, size, maximum number of persons and the proportion of glass elements. So you can find precisely the spa shower that suits you!

Cabin models

CAB-F

pentagonal

without glass front **with glass front**

CAB-R

rectangular

without glass front **with glass front**

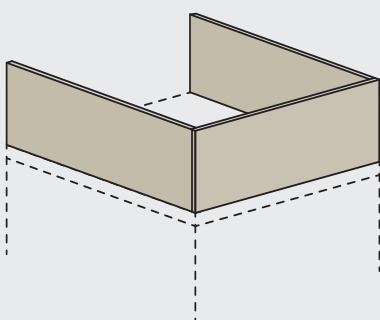

CAB-Q

square

without glass front **with glass front**

Material proportions:

	Hard foam		Glass		Metal
---	------------------	---	--------------	---	--------------

For an attractive look, a seamless transition between cabin and room ceiling can be achieved with a **panel made of hard foam** support elements. So not only cables and pipes disappear from view – cleaning is also easier.

Individual extras

Floor

Standard grate

Design grate „ANGOLO”

Are exclusive looks important to you? Then choose a shower base made of hard foam support material. That creates the perfect substrate for tiles and you can adapt them individually to suit the bathroom design.

There is a choice of six different **design grates** for the drain system. Whether standard version, tileable version or with patterns ranging from geometric to Mediterranean: the grating is a particular **highlight** in your shower.

Design grate „CUBE“

Design grate „LUMEN“

Design grate „MARE“

Design grate „VARI“

Individual extras

Sound

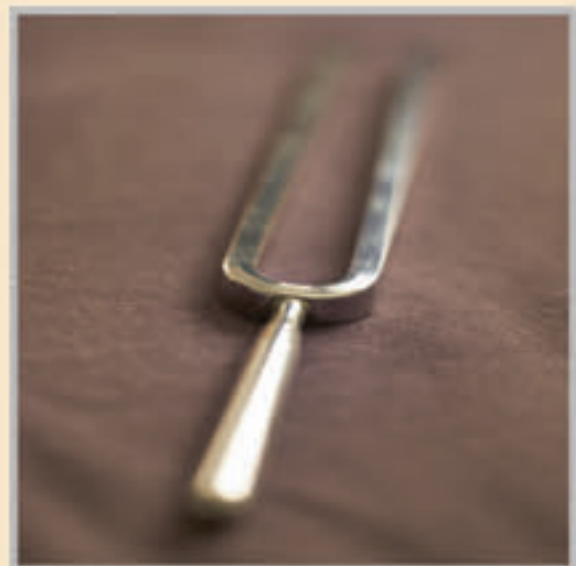

Sound has a direct effect on our wellbeing. The bandwidth ranges from invigorating to relaxing. So that you can experience these effects under the shower, too, there are different audio systems for the wet area. Start your morning with your favourite songs or let the evening draw gently to a close under the shower with chillout music..

It can be even more relaxing if your spa shower has steam technology.

Popular soundscapes for a relaxing steam bath are, for example, the sound of the sea or the vibration of singing bowls..

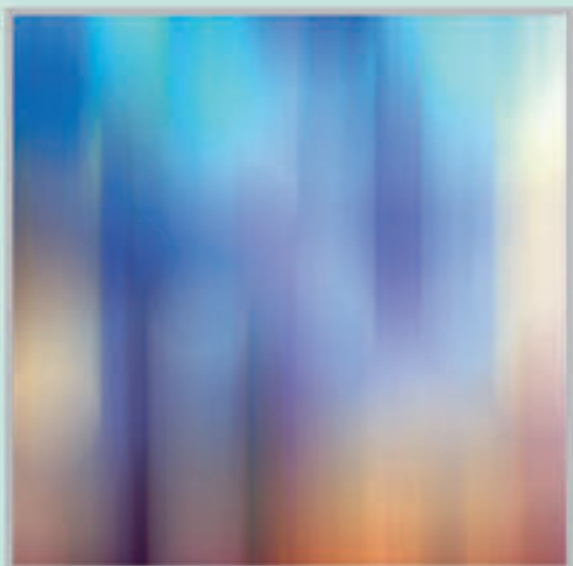

Your professional planner will accommodate your wishes. Let them advise you.

Individual extras

Light

Light has many functions and facets. Not only is it vitally important, it also influences our mood and has an effect on the organism. Light is often used in combination with colours for therapeutic purposes in the spa area. In addition, it is the perfect means of creating a comfortable atmosphere.

A spa shower also benefits from integrated light sources. The room can be fully illuminated with dimmable ceiling spots.

Do you want discreet lighting accents? The LED light strips in niches are just the job.

Your professional planner will help you choose. Let them advise you.

Individual extras

Man cannot do without warmth.

It is beneficial to health in many regards: Muscular tension is released, the circulation is stimulated and pain is eased.

In addition, it makes the body more flexible.

Warmth is **the** means of relieving stress.
It relaxes body and soul. Use these effects
in your spa shower, too.

There are lots of possibilities.
One of them is heated bench seats.

Your professional planner knows all the options.
Let them advise you.

Individual extras

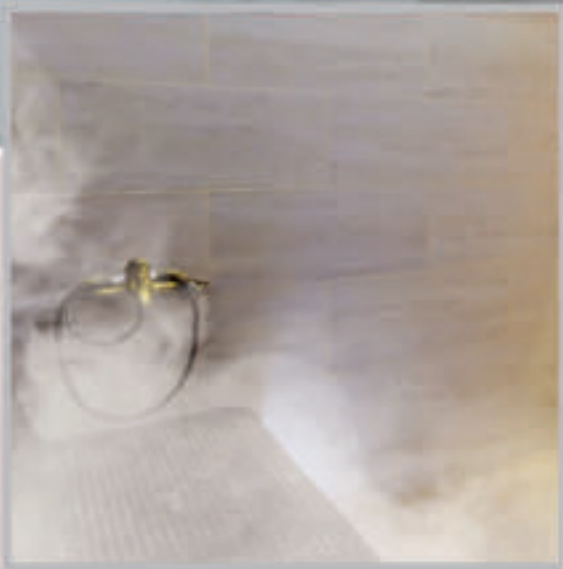

Steam

Steam is a tried and tested remedy. The human body can gently purify itself in a steam bath. Moderate temperatures of around 45 degrees in combination with very high humidity open the pores and clean the respiratory tract.

Those who regularly enjoy a steam bath fortify their immune system and avoid illness.

This is also possible at home in a spa shower with the right steam technology.

This way you can relax in your private steam bath to your heart's content and promote your health – whenever you like.

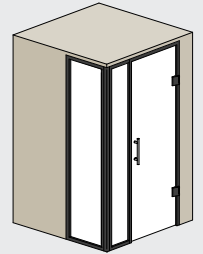

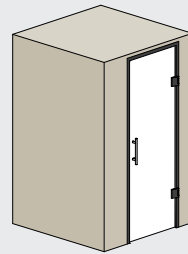

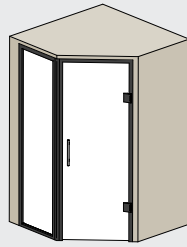

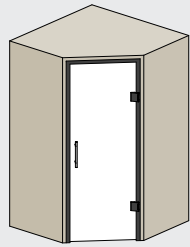

Your professional planner will help with the technical implementation. Let them advise you.

Inspirations

for your bathroom planning

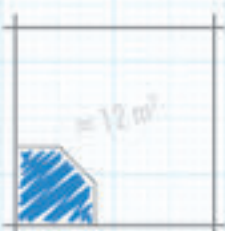

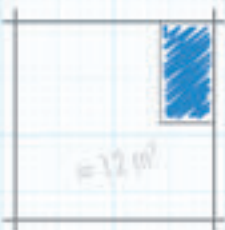

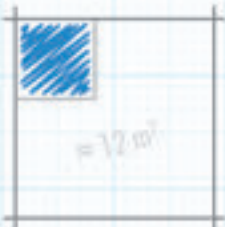

No two rooms are alike. There are already differences in the basic shape: square, rectangular, narrow, angular, with niche or bay. The arrangement and position of windows and doors also differ individually.

So that you can find a suitable spa shower for every room situation, the models have been designed to cover all possibilities. For example, would you like to compensate even out a corner or fill a niche? Or would you like your shower to occupy a central position in the room?

Room: **Square** shape

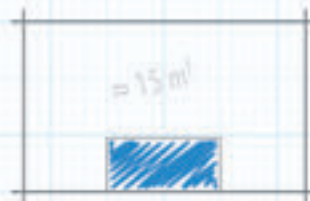

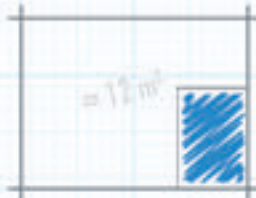

Placement examples

Room: **Rectangular** shape

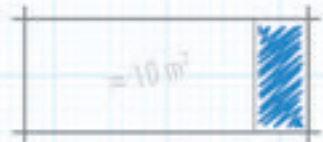

Placement examples

Room: **Narrow** shape

Placement examples

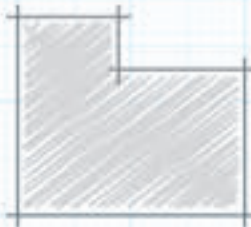

You will find the solution with LUX ELEMENTS®-SPA CAB!

Precise adaptation is achieved via a stepless extension of up to 300 mm on one or both sides.

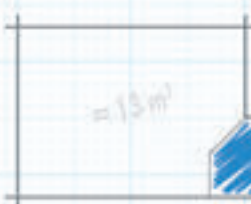

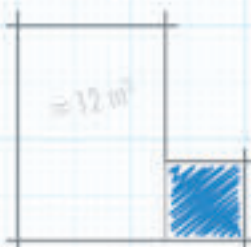

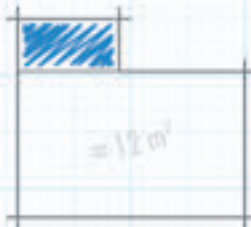

Please observe:

The installation of a spa shower is a planned performance in which many details have to be considered, for example existing water pipes and power lines. **Let a professional planner advise you.**

Individuality becomes reality

- Various basic shapes for one to two persons
- Individual placement:
Free-standing, in front of the wall, in a corner of the room or a niche
- Adaptable to the room situation through stepless extension
- Free choice of technical components
- Various usage possibilities:
also usable as a steam bath with a steam generator
- Individual design with tiles and plaster as desired
